

GROWING OUR BUSINESS PARTNERSHIPS

For the first time, Garden Partners is asking businesses to support its important work in the community with a cash contribution.

This year our programs have offered residents of long-term care facilities, including Alzheimer's care, an opportunity to experience what they truly miss the most --
-- using their hands to work with seeds, soil, and plants;
watering and watching them grow, and finally,
harvesting vegetables, cutting flowers, and tasting herbs.

Words do not fully describe the results we see when residents experience a renewed sense of well-being, satisfaction in their own abilities, and the joy of working with plants.

Frequently, there is a marked increase in positive interactions between residents, family members and staff, and a decrease in the residents' levels of stress, anxiety, depression and isolation.

We Invite You and Your Business To Become A Garden Partner.

Your gift will allow us to expand our programs to new facilities during 2006.

Yes, you can count on us to BECOME A GARDEN PARTNER
